

IT / ICT Management

manage technology resources in accordance with its needs and priorities.

Management Responsibility

involves many of the basic management functions such as budgeting, personnel and organization and control, along with other aspects that are unique to technology, such as change management, software design, network planning, technical support, etc.

Taking Care of Business

Include investments like hardware, software, data, networks and data centre facilities, as well as the staffs who are hired to maintain them.

Create Value by Technology

Requires the alignment of technology and business strategies.

While the value creation for an organization involves a network of relationships between internal and external environments, technology plays an important role in improving the overall value chain of an organization.
